

```
1  class ListTasks {
2      private taskRepository: TaskRepository;
3
4      constructor(taskRepository: TaskRepository) {
5          this.taskRepository = taskRepository;
6      }
7
8      execute(): Task[] {
9          return this.taskRepository.getAllTasks();
10     }
11 }
```
