

## Casos de uso

ListTasks

## Interfaces externas

TaskRepository

```
graph LR; subgraph "Casos de uso"; U1(ListTasks); end; subgraph "Interfaces externas"; I1(TaskRepository); end; U1 -.-> I1;
```

The diagram illustrates a dependency between a use case and an external interface. On the left, a red-shaded box labeled 'Casos de uso' contains a rounded rectangle labeled 'ListTasks'. On the right, a blue-shaded box labeled 'Interfaces externas' contains a rounded rectangle labeled 'TaskRepository'. A horizontal arrow points from the 'ListTasks' use case to the 'TaskRepository' interface, indicating that the use case depends on the interface.
