

```
1 interface Task {
2     id: number;
3     title: string;
4     description: string;
5 }
6
7 interface TaskRepository {
8     getAllTasks(): Task[];
9     getTaskById(taskId: number): Task | undefined;
10    createTask(task: Task): void;
11    updateTask(task: Task): void;
12    deleteTask(taskId: number): void;
13 }
```
